

PC MODULES

Clear Touch Interactive® panels offer five levels of PC modules for enhancing the power of your interactive panels. You can purchase your panel with a PC Module or upgrade down the road.

Key Benefits of Embedded Computing

Make set-up simpler.

Choosing the PC modules standardizes and simplifies the process for your IT department. This PC is easily manageable over your network so you can do it yourself. Or Clear Touch™ offers to load programs for an additional service cost.

Service or upgrade your computer module with no downtime.

With a removable, onboard computer, maintenance is easy. No need to move the entire interactive panel just to fix the computer module. Should you ever need to repair or upgrade the computer, simply take out the PC module and send it in for servicing. While you're waiting for the maintenance to be completed, connect wirelessly with your laptop or tablet or use another PC module or integrated android and continue using the panel.

Key Features

INTEL® CORE™ PROCESSORS

Powerful processing optimized for multimedia applications

DDR4 RAM

High speed memory provides responsive experience

SDD STORAGE

High speed storage for rich multimedia content

INTEL™ HD OR NVIDIA GRAPHICS

Ultra HD display delivering stunning visuals
